

Data Centers

Holder Properties has completed over 3.8 million square feet of high-technology facilities. Based on this experience, Holder Properties is able to develop very sophisticated data centers on a cost effective basis within very aggressive time frames. Holder Properties' approach provides the following benefits:

- Experienced guidance (reliability and cost analysis)
- Single source solution
- Hyper track scheduling
- Reduced cost per square foot
- Guaranteed costs and schedules

The following examples give an overview of the data center projects that Holder Properties has completed, or is currently developing.
